## SAMPLING STATIONS

Sampling stations, or sampling hydrants, are designed to collect bacteriological samples, even in colder climates. Samples are taken at specific location points from the water main.

These sampling stations are used to determine water quality and help maintain safe drinking water supplies.

Sampling stations can help lower false positives, make collection times faster, and reduce liability issues in municipal water supplies.

### BENEFITS

- Low maintenance
- Long life
- Bacteria sampling
- Helps maintain water quality
- Corrosion resistant
- Easy to install

### SPECIFICATIONS

- Lead Free
- AIS
- ARRA
- ANSI/NSF 372

### APPLICATIONS

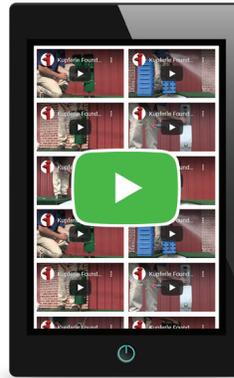

- Municipal Water Supply Water Sampling
- Bacteria Level Analysis of Water Supply

# VALUE ADDED DISTRIBUTOR

## OF WATERWORKS INFRASTRUCTURE PRODUCTS

### OUR MODELS:

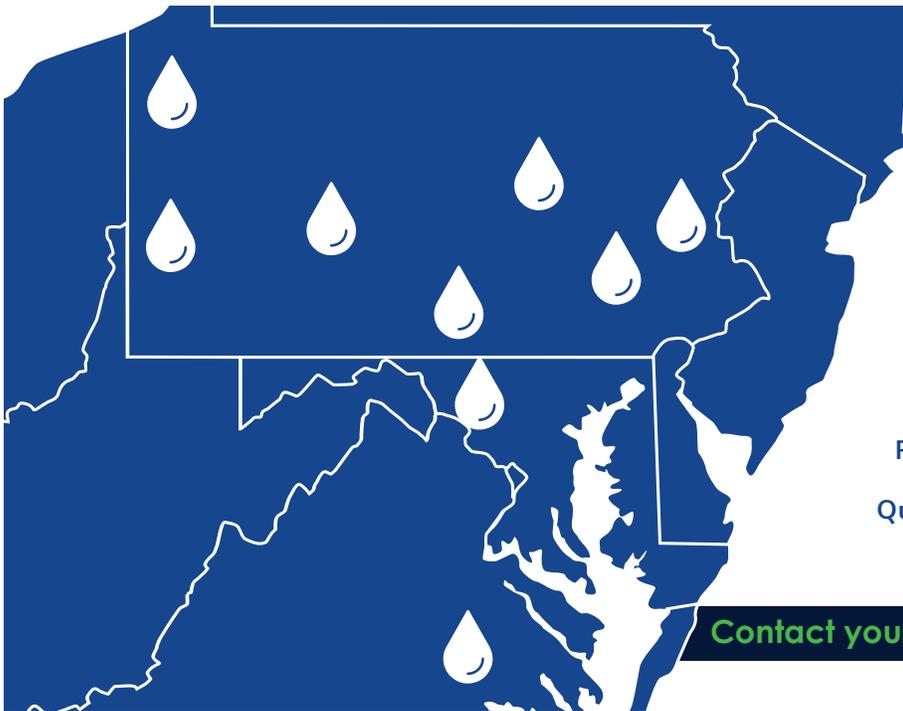

- Eclipse #82
- Eclipse #82WC
- Eclipse #88
- Eclipse #88-SS
- Eclipse #88WC
- Eclipse #88WC-SS
- MainGuard #66
- MainGuard #66MB
- MainGuard #92 & 92VB
- MainGuard #94WM
- MainGuard #95WM
- MainGuard#66WC (For Warm Climates)
